Property Description

BEAUTIFUL, Remodeled North Glendora Home! This property has gone through a complete remodel, down to the studs! Upon entering the home, you will find Italian porcelain tile flooring throughout the open style floorplan and into the recently remodeled kitchen with platinum quartzite countertops, soft closing cabinets and drawers, stainless steel Thermador appliances, and a large island with waterfall countertops. The kitchen leads into an open family room with an electric fireplace, and 2 sliders that lead to a beautiful backyard with a sparkling pebble tech/salt water pool and spa! The backyard includes a fire pit and nice pergola with a water line and gas line ready for your outdoor kitchen. Just off the family room is a large master suite with a sitting area and slider that leads out to the pool. This master suite includes a large walk-in closet and it's own en-suite, full bath, and also it's own private entrance! On the other side of the house are 2 more large bedrooms, another full bathroom, and a 2nd master suite with barn doors that lead to the beautiful master bathroom with large soaking tub and stand-up shower. There is also a slider off this master bathroom that leads out to the backyard. The indoor laundry room is just off the kitchen, and has a built in sink and cabinets. New copper plumbing, 3 year old composition roof, stamped concrete driveway, and RV parking! Too many upgrades to mention! Come and see this beautiful home today! Pride of ownership throughout.
